

Live Register June 2010

	Live Register Total	Seasonally Adjusted
June 2009	415,462	407,700
May 2010	437,922	439,100
June 2010	452,882	444,900
Change in month	+ 14,960	+ 5,800
Change in year	+ 37,420	+ 37,200

Seasonally adjusted Live Register rises to 444,900 in June

The seasonally adjusted Live Register total increased from 439,100 in May to 444,900 in June, an increase of 5,800. *See table 2a and graph opposite.*

In the year to June 2010 there was an unadjusted increase in the Live Register of 37,420 (+9.0%). This compares with an increase of 43,788 (+11.1%) in the year to May 2010.

Other features include:

- ◆ There was an increase of 4,800 males and 1,100 females in the seasonally adjusted series in June. *See table 2a.*
- ◆ The average net weekly increase in the seasonally adjusted series in June 2010 was 1,450, which compares with a weekly increase of 1,650 in the previous month. *See table 2a and background notes.*
- ◆ The standardised unemployment rate in June was 13.4%. This compares with 12.9% in the first quarter of 2010, the latest seasonally adjusted unemployment rate from the Quarterly National Household Survey. *See table 3 and background notes.*
- ◆ In the month, the estimated number of casual and part-time workers on the Live Register was 41,790 males and 37,449 females. *See background notes.*

The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Jobseekers Benefit or Allowance. Unemployment is measured by the Quarterly National Household Survey and the latest seasonally adjusted figure, for January to March 2010, is 277,400 persons unemployed.

Additional Live Register tables for June 2010 will be available on Friday 2nd July 2010.

¹ Average net weekly changes are calculated by dividing the total monthly change by the number of weeks in the reference month.

Background Notes

Source and scope of the Live Register The Live Register is compiled from returns made for each local office to the Central Statistics Office by the Department of Social Protection. It comprises persons under 65 years of age in the following classes:

- ◆ All Claimants for Jobseekers Benefit (JB) excluding systematic short-time workers
- ◆ Applicants for Jobseekers Allowance (JA) excluding smallholders/farm assists and other self-employed persons
- ◆ Other registrants including applicants for credited social insurance contributions but excluding those directly involved in an industrial dispute.

Reference Period The reference periods for the Live Register results are as follows:
 June 2010 – 29th May 2010 to 25th June 2010
 June 2009 – 30th May 2009 to 26th June 2009

Unemployment statistics The Live Register is not designed to measure unemployment. It includes part-time (those who work up to three days a week), seasonal and casual workers entitled to Jobseekers Allowance or Jobseekers Benefit. **Unemployment is measured by the Quarterly National Household Survey** (formerly the Annual Labour Force Survey).

Standardised unemployment rates The Standardised Unemployment Rate (SUR) series in Table 3 is based on the estimated number of persons unemployed expressed as a percentage of the total economically active population (i.e. the Labour Force), using internationally comparable definitions of employment and unemployment, as recommended by the International Labour Office. Benchmark estimates of the SUR for February, May, August and November of each year are calculated using seasonally adjusted data from the Quarterly National Household Survey (QNHS). The monthly trend in the seasonally adjusted Live Register is then used to estimate the monthly SUR between successive surveys. The traditional estimation approach has been used from April 1997 onwards.

QNHS The QNHS, which began in September 1997, replaced the Labour Force Survey and provides quarterly estimates of the unemployment rate. Up to and including the fourth quarter of 2008 the QNHS operated on a seasonal quarter basis. As of the first quarter 2009 the QNHS is now undertaken on a calendar quarter basis.

The calendar reference quarters for survey results are:

Q1 - January to March, Q2 - April to June, Q3 - July to September and Q4 - October to December.

The estimates (adjusted for seasonality) over the past 5 years are:

	Q1	Q2	Q3	Q4
	%	%	%	%
2005	4.2	4.6	4.4	4.3
2006	4.4	4.4	4.5	4.3
2007	4.5	4.5	4.4	4.8
2008	4.9	5.5	6.8	8.1
2009	10.2	11.6	12.3	13.3
2010	12.9			

Seasonal adjustment The seasonal adjustment of the Live Register is completed using the X-11 Variant of the US Bureau of Census Method 2 (Additive Option). The seasonally adjusted series are updated twice yearly, in January and July; pending the next updating, seasonal adjustment for intervening months is carried out using projected seasonal factors. In Tables 2a, b and c, the seasonally adjusted totals are the sum of the relevant seasonally adjusted series for males and females, under and over 25 years.

Casual and part-time workers The casual and part-time workers' figure is based on an estimate supplied by the Department of Social Protection. People may apply for Jobseekers Benefit/Allowance if they only work for part of a week and be included on the Live Register.
